Modern Approach to Evidence (American Casebook Series) Richard O. Lempert, Samuel R. Gross, James S. Liebman

Includes a path-breaking reorganization of the treatment of the rules that govern evidence of character and credibility. Focuses on social scientific information that bears on the design and operation of rules of evidence. Improved format includes an array of problems that explore the nooks and crannies of the rules of evidence, but most of these problems are now grouped at the end of chapters, or at a few natural break points in the longer chapters. A smaller group of comparatively simple problems are interspersed throughout the text where they illustrate and test the students' understanding of the rules that have just been discussed.
