## **The Chemistry of Catalytic Hydrocarbon Conversions** Herman Pines

The Chemistry of Catalytic Hydrocarbon Conversions covers the various chemical aspects of catalytic conversions of hydrocarbons. This book is composed of eight chapters that include catalytic synthesis of hydrocarbons from carbon monoxide, hydrogen, and methanol.

The opening chapters examine various acid- and base-catalyzed reactions, such as isomerization, polymerization, oligomerization, alkylation, catalytic cracking, reforming, hydrocracking, and hydrogenation. The subsequent chapters are devoted to specific catalytic reactions, including heterogeneous hydrogenation, dehydrogenation, aromatization, and oxidation. Other chapters describe the homogeneous catalysis by transition metal organometallic catalysts and the metathesis of unsaturated hydrocarbons. The concluding chapter deals with the synthesis of liquid hydrocarbon fuels from carbon monoxide, hydrogen, methanol, and dimethyl ether.

This book is of great benefit to petroleum chemists, engineers, and researchers.

### **From reader reviews:**

#### **Sylvia Dasilva:**

With other case, little folks like to read book The Chemistry of Catalytic Hydrocarbon Conversions. You can choose the best book if you like reading a book. Provided that we know about how is important any book The Chemistry of Catalytic Hydrocarbon Conversions. You can add knowledge and of course you can around the world by way of a book. Absolutely right, due to the fact from book you can know everything! From your country until foreign or abroad you may be known. About simple matter until wonderful thing you could know that. In this era, we are able to open a book or even searching by internet unit. It is called e-book. You should use it when you feel weary to go to the library. Let's learn.

#### **Jodie Jennings:**

What do you consider book? It is just for students since they are still students or it for all people in the world, exactly what the best subject for that? Simply you can be answered for that concern above. Every person has distinct personality and hobby for each and every other. Don't to be pressured someone or something that they don't desire do that. You must know how great as well as important the book The Chemistry of Catalytic Hydrocarbon Conversions. All type of book is it possible to see on many resources. You can look for the internet sources or other social media.

#### **Nancy Gump:**

The knowledge that you get from The Chemistry of Catalytic Hydrocarbon Conversions is the more deep you looking the information that hide inside the words the more you get thinking about reading it. It does not mean that this book is hard to recognise but The Chemistry of Catalytic Hydrocarbon Conversions giving you enjoyment feeling of reading. The article writer conveys their point in certain way that can be understood by simply anyone who read it because the author of this guide is well-known enough. This book also makes your own vocabulary increase well. It is therefore easy to understand then can go together with you, both in printed or e-book style are available. We recommend you for having this The Chemistry of Catalytic Hydrocarbon Conversions instantly.

#### **Jim Loop:**

Information is provisions for those to get better life, information these days can get by anyone at everywhere. The information can be a know-how or any news even a problem. What people must be consider any time those information which is inside former life are difficult to be find than now could be taking seriously which one is appropriate to believe or which one often the resource are convinced. If you obtain the unstable resource then you understand it as your main information it will have huge disadvantage for you. All those possibilities will not happen inside you if you take The Chemistry of Catalytic Hydrocarbon Conversions as your daily resource information.
