## Productive Engagement in Later Life: A Global Perspective

Productive Ageing is the involvement of older adults in society through employment, volunteering, caregiving, education and skill building. In 2020 there will be 248 million people in China aged 60 and over. At the same time, the birth rate continues to drop and family structures are being transformed. In the face of such pressing demographic challenges, the productive engagement of older adults is a clear-cut strategy to strengthen families and communities while simultaneously promoting the health of older adults. From a human capital perspective, an ageing population represents resources to address societal needs; and the active engagement of older adults can enhance and maintain the physical, mental and cognitive health of the older adults. The challenge is to develop policies that support productive engagement and implement evidence-based programs that create opportunities for older adults in active engagement in the community. Contributions of older adults will be necessary for social and economic development of families, communities, and society. *Productive Engagement in Later Life* covers the 2009 China conference on productive aging and discusses how to initiate and build productive aging agenda in China and around the globe.

This book was originally published as a special issue of *China Journal of Social Work*.
