Tutorial Distance Learning: Rebuilding Our Educational System (Innovations in Science Education and Technology) Alfred Bork, Sigrun Gunnarsdottir

Learning is a critical worldwide problem for humans, essential to create a peaceful and happy world. We have serious problems in learning in both wealthy and poor areas. New approaches to learning are needed, as the current system may not rise to the new challenges.

This book proposes a new strategy for learning, worldwide and for all ages of students. Computer-based distance learning would be the major delivery mechanism, with very large numbers of students. The very frequent interactions between the student and the computer would be like that with a skilled human teacher. These interactions would take place in the student's native language, in both directions. A typical interaction would be a question to a student, and a free-form student response. Both voice and keyboard student input would be possible. The learning programs would work with each student until mastery is achieved, adapting to the needs of each. Students would be active learners.

The book begins with the problems and goals of learning. It considers possible forms of distance learning, looking at the variables involved, current examples of distance learning, and possible future forms including examples from science fiction. It then investigates student interactions, considering both frequency of interactions and the quality of each interaction. Programs developed in the Educational Technology Center at the University of California, Irvine, illustrate the critical idea of tutorial learning with computers. Production of tutorial learning material and costs for a student hour of learning is discussed. The book ends with suggestions for future progress.

Current hardware and software is fully adequate for the tasks described. Development of all required learning units is a major activity. After this development, both better quality of learning and lower costs are very likely. Further experimental work is essential to understand the possibilities.

From reader reviews:

Lois Jennings:

Nowadays reading books become more and more than want or need but also turn into a life style. This reading habit give you lot of advantages. Advantages you got of course the knowledge the actual information inside the book that will improve your knowledge and information. The data you get based on what kind of guide you read, if you want drive more knowledge just go with knowledge books but if you want feel happy read one using theme for entertaining such as comic or novel. The actual Tutorial Distance Learning: Rebuilding Our Educational System (Innovations in Science Education and Technology) is kind of book which is giving the reader capricious experience.

Jennifer Buster:

Reading a guide can be one of a lot of exercise that everyone in the world really likes. Do you like reading book therefore. There are a lot of reasons why people enjoyed. First reading a publication will give you a lot of new information. When you read a reserve you will get new information because book is one of many ways to share the information or perhaps their idea. Second, studying a book will make you actually more imaginative. When you looking at a book especially fiction book the author will bring one to imagine the story how the characters do it anything. Third, it is possible to share your knowledge to other people. When you read this Tutorial Distance Learning: Rebuilding Our Educational System (Innovations in Science Education and Technology), you are able to tells your family, friends and also soon about yours reserve. Your knowledge can inspire the mediocre, make them reading a book.

Jack Morgan:

Are you kind of active person, only have 10 or maybe 15 minute in your time to upgrading your mind expertise or thinking skill perhaps analytical thinking? Then you are experiencing problem with the book when compared with can satisfy your short space of time to read it because pretty much everything time you only find reserve that need more time to be examine. Tutorial Distance Learning: Rebuilding Our Educational System (Innovations in Science Education and Technology) can be your answer because it can be read by you who have those short time problems.

William Hill:

That reserve can make you to feel relax. That book Tutorial Distance Learning: Rebuilding Our Educational System (Innovations in Science Education and Technology) was multi-colored and of course has pictures around. As we know that book Tutorial Distance Learning: Rebuilding Our Educational System (Innovations in Science Education and Technology) has many kinds or type. Start from kids until young adults. For example Naruto or Detective Conan you can read and believe that you are the character on there. Therefore , not at all of book are usually make you bored, any it offers you feel happy, fun and rest. Try to choose the best book for yourself and try to like reading which.
