The Getting It System Toolkit (GIST), a suite of free and open source tools & software, leverages systems to optimize library acquisitions and deselection workflow, reducing the staff time necessary to make informed decisions and process materials. The Toolkit is divided into two functions:

- GIST for ILLiad consists of three components that enhance the ILLiad® interlibrary loan request management software: addons, webpage customizations, and the acquisitions manager. All three components may be selectively utilized in ILLiad, for instance, ILLiad web pages may be applied to enhance the end-user request interface to add full-text discovery, or an ILLiad Addon can help ILL's purchase on demand program discover the best way to purchase items difficult to borrow. By combining all three and customizing these components for your library, you achieve significant benefits and optimize the combination of Acquisitions and ILL services.
- The GIST Gift & Deselection Manager (GDM) is designed to manage and streamline library workflow for processing gifts and evaluating materials for weeding. It is standalone open-source software that automates the gathering of data for evaluating donations; including holdings, edition comparisons, full-text, and other data. The GDM also enables collection managers to perform item-by-item deselection or use the batch analysis tool to create custom deselection reports for large weeding projects.

Building Responsive Library Collections with the Getting It System Toolkit combines helpful how-tos from the developers themselves, and first-hand implementation accounts from users of these time-saving tools. The volume is split into the Toolkit's use with ILLiad and GDM, providing easy reference for users. This manual is an invaluable resource to any library using, or considering using, the Getting It System Toolkit. From reader reviews:

Fannie Garcia:

The reason? Because this Building Responsive Library Collections with the Getting It System Toolkit is an unordinary book that the inside of the guide waiting for you to snap this but latter it will surprise you with the secret the item inside. Reading this book adjacent to it was fantastic author who else write the book in such incredible way makes the content on the inside easier to understand, entertaining way but still convey the meaning fully. So , it is good for you because of not hesitating having this any more or you going to regret it. This excellent book will give you a lot of gains than the other book get such as help improving your talent and your critical thinking approach. So , still want to postpone having that book? If I have been you I will go to the guide store hurriedly.

Edward Emory:

This Building Responsive Library Collections with the Getting It System Toolkit is great book for you because the content which can be full of information for you who also always deal with world and possess to make decision every minute. This specific book reveal it data accurately using great organize word or we can say no rambling sentences in it. So if you are read it hurriedly you can have whole details in it. Doesn't mean it only provides you with straight forward sentences but challenging core information with wonderful delivering sentences. Having Building Responsive Library Collections with the Getting It System Toolkit in your hand like getting the world in your arm, info in it is not ridiculous one. We can say that no publication that offer you world inside ten or fifteen tiny right but this book already do that. So , this is good reading book. Heya Mr. and Mrs. hectic do you still doubt that will?

Cheryl Steele:

In this particular era which is the greater particular person or who has ability in doing something more are more important than other. Do you want to become certainly one of it?
