Civic Learning, Democratic Citizenship and the Public Sphere

Civic Learning, Democratic Citizenship and the Public Sphere

This book explores the relationships between learning, democratic citizenship and the public sphere from three interconnected angles: theory, methodology and research. The main message of the book is that civic learning necessarily has a public character, as it is learning that emerges from engagement in democratic processes and practices that occur both at the centre and the margins of society. Through a combination of theoretical development, methodological reflection and empirical case study, the chapters in the book provide new insights in the complexities of learning in the context of the ongoing struggle for democracy.
