The African grasslands stretch across the continent below the Sahara. In a square of land about the size of a living room, children will see animals they might have encountered only at the zoo. . .discover the rewards and dangers of their natural home. . .and observe how these creatures live with each other in a changing, endangered environment. It's an exciting journey of discovery, coming to you from the One Small Square series of interactive science and nature books. . .where the next stop could be as near as your backyard or as far as half a world away.
