Communication and Control: Tools, Systems, and New Dimensions

Communication and Control: Tools, Systems, and New Dimensions

Communication and Control: Tools, Systems, and New Dimensions advocates a systems view of human communication in a time of intelligent, learning machines. This edited collection sheds new light on things as mundane yet still profoundly consequential (and seemingly “low-tech”) as push buttons, pagers, and telemarketing systems. Contributors also investigate aspects of “remote control” related to education, organizational design, artificial intelligence, cyberwarfare, drones, and even binge-watching on Netflix. In line with a systems view, the collection takes up a media ecological view. This work will be of interest to students, scholars, and researchers in communication, new media, and technology.
