## **Peripheral Neuropathy: When the Numbness, Weakness and Pain Won't Stop (American Academy of Neurology)** Norman Latov PhD MD, Norman Dr. Latov

Peripheral neuropathy affects 10 to 20 million people in the U.S, including ten per cent of all people who have diabetes. This condition has numerous causes, but can be associated with diseases such as HIV, alcoholism, and lupus, and may result from treatments for other medical conditions, such as cancer chemotherapy. Symptoms include pain, numbness, loss of balance, and tingling in the extremities. Although a widespread condition, most people don't know about it, and when diagnosed find it difficult to obtain information.

*Peripheral Neuropathy*, by Norman Latov, Professor of Neurology at the Weill Medical College of Cornell University, explains what we know about neuropathy, including its causes and manifestations, and what can be done to manage it. Topics covered include:

- The causes of peripheral neuropathy
- Drug therapy for the condition itself and for managing symptoms such as pain
- Interventional therapy
- Caring for your feet
- Personal accounts of people living with neuropathy
- Alternative medicines, and much more

This indispensable guide will help millions of people understand this condition so that they can take control of their lives and make informed decisions. In addition, it will be a useful resource for their families, caregivers, and health care providers.
