Probabilistic Robotics (Intelligent Robotics and Autonomous Agents series)

Sebastian Thrun, Wolfram Burgard, Dieter Fox

Probabilistic Robotics (Intelligent Robotics and Autonomous Agents series) Sebastian Thrun, Wolfram Burgard, Dieter Fox

Probabilistic robotics is a new and growing area in robotics, concerned with perception and control in the face of uncertainty. Building on the field of mathematical statistics, probabilistic robotics endows robots with a new level of robustness in real-world situations. This book introduces the reader to a wealth of techniques and algorithms in the field. All algorithms are based on a single overarching mathematical foundation. Each chapter provides example implementations in pseudo code, detailed mathematical derivations, discussions from a practitioner's perspective, and extensive lists of exercises and class projects. The book's Web site, www.probabilistic-robotics.org, has additional material. The book is relevant for anyone involved in robotic software development and scientific research. It will also be of interest to applied statisticians and engineers dealing with real-world sensor data.

From reader reviews:

Kevin Burkes:

This Probabilistic Robotics (Intelligent Robotics and Autonomous Agents series) book is not ordinary book, you have it then the world is in your hands. The benefit you get by reading this book is actually information inside this e-book incredible fresh, you will get data which is getting deeper a person read a lot of information you will get. This particular Probabilistic Robotics (Intelligent Robotics and Autonomous Agents series) without we know teach the one who reading through it become critical in considering and analyzing. Don't become worry Probabilistic Robotics (Intelligent Robotics and Autonomous Agents series) can bring if you are and not make your handbag space or bookshelves' come to be full because you can have it with your lovely laptop even mobile phone. This Probabilistic Robotics (Intelligent Robotics and Autonomous Agents series) having excellent arrangement in word and layout, so you will not experience uninterested in reading.

Robert Zamora:

This book untitled Probabilistic Robotics (Intelligent Robotics and Autonomous Agents series) to be one of several books that best seller in this year, here is because when you read this e-book you can get a lot of benefit into it. You will easily to buy that book in the book retailer or you can order it through online. The publisher in this book sells the e-book too. It makes you quicker to read this book, since you can read this book in your Mobile phone. So there is no reason to you to past this e-book from your list.

Donna Bradford:

The book untitled Probabilistic Robotics (Intelligent Robotics and Autonomous Agents series) contain a lot of information on that. The writer explains the girl idea with easy method. The language is very straightforward all the people, so do not worry, you can easy to read it. The book was written by famous author. The author gives you in the new era of literary works. You can easily read this book because you can read on your smart phone, or gadget, so you can read the book throughout anywhere and anytime. If you want to buy the e-book, you can open their official web-site and also order it. Have a nice study.

Robert Monson:

What is your hobby? Have you heard this question when you got pupils? We believe that that query was given by teacher on their students. Many kinds of hobby, Every person has different hobby. Therefore you know that little person similar to reading or as examining become their hobby. You have to know that reading is very important in addition to book as to be the factor. Book is important thing to increase you knowledge, except your personal teacher or lecturer. You see good news or update with regards to something by book. Different categories of books that can you go onto be your object. One of them is actually Probabilistic Robotics (Intelligent Robotics and Autonomous Agents series).
