Active Processes and Otoacoustic Emissions in Hearing (Springer Handbook of Auditory Research)

Active Processes and Otoacoustic Emissions in Hearing (Springer Handbook of Auditory Research)

The cochlea does not just pick up sound, it also produces sounds of low intensity called Otoacoustic Emissions (OAEs). Sounds produced by healthy ears – either spontaneously or in response to stimuli - allow researchers and clinicians to study hearing and cochlear function noninvasively in both animals and humans. This book presents the first serious review of the biological basis of these otoacoustic emissions.
