**A Vision for Universal Preschool Education** Edward Zigler, Walter S. Gilliam, Stephanie M. Jones

Decades of research point to the need for a universal preschool education program in the U.S. to help give our nation's children a sound cognitive and social foundation on which to build future educational and life successes. In addition to enhanced school readiness and improved academic performance, participation in high quality preschool programs has been linked with reductions in grade retentions and school drop out rates, and cost savings associated with a diminished need for remedial educational services and justice services. This 2006 book brings together nationally renowned experts from the fields of psychology, education, economics and political science to present a compelling case for expanded access to preschool services. They describe the social, educational, and economic benefits for the nation as a whole that may result from the implementation of a universal preschool program in America, and provide guiding principles upon which such a system can best be founded.
