## **Vermiculture Technology: Earthworms, Organic Wastes, and Environmental Management**

Co-edited by international earthworm expert Clive A. Edwards, **Vermiculture Technology: Earthworms, Organic Wastes, and Environmental Management** is the first international, comprehensive, and definitive work on how earthworms and microorganisms interact to break down organic wastes on a commercial basis. Many books cover the importance of composting for reducing the amount of organic wastes in landfills. This reference focuses on innovative vermiculture technology that turns organic waste into a value-added environmentally friendly products that can improve soil fertility and productivity on a large scale.

## **Chronicles more than two decades of growth and changes in earthworm composting technology**

Based on the work of an outstanding international cast of scientists, the book explores the dramatic growth and changes in vermiculture technology since 1988 and assesses advances made in government-funded projects in the United States and United Kingdom. The contributors discuss outdoor and indoor windrows, container systems, wedge systems, and low labor-requirement, fully-automated continuous flow vermicomposting reactor systems that can process more than 1000 tons of organic wastes per reactor per annum. They also highlight the science and biology behind the use and efficacy of vermicomposting, examine its importance to developing countries, and detail the technology of the past, present, and future.

Although the development of a range of vermicomposting technologies has been rapid and the spread of vermicomposting dramatic, the scientific literature remains scattered throughout a range of journals, newsletters, and online resources. As a compilation of information designed specifically to have an extended shelf life, this volume chronicles how vermiculture can be brought into full commercial and industrial development and find application in integrated waste management systems.

### **From reader reviews:**

#### **Bruce Jones:**

Why don't make it to become your habit? Right now, try to prepare your time to do the important take action, like looking for your favorite e-book and reading a publication. Beside you can solve your problem; you can add your knowledge by the reserve entitled Vermiculture Technology: Earthworms, Organic Wastes, and Environmental Management. Try to the actual book Vermiculture Technology: Earthworms, Organic Wastes, and Environmental Management as your good friend. It means that it can to be your friend when you sense alone and beside those of course make you smarter than ever before. Yeah, it is very fortuned for you. The book makes you more confidence because you can know every little thing by the book. So , let me make new experience as well as knowledge with this book.

#### **Pamela Acuna:**

As people who live in often the modest era should be change about what going on or data even knowledge to make these people keep up with the era that is always change and progress. Some of you maybe will probably update themselves by studying books. It is a good choice for you personally but the problems coming to anyone is you don't know which you should start with. This Vermiculture Technology: Earthworms, Organic Wastes, and Environmental Management is our recommendation to make you keep up with the world. Why, since this book serves what you want and wish in this era.

#### **Betty Guinn:**

Reading a guide tends to be new life style in this particular era globalization. With examining you can get a lot of information that may give you benefit in your life. Using book everyone in this world can certainly share their idea. Guides can also inspire a lot of people. Many author can inspire their reader with their story as well as their experience. Not only situation that share in the textbooks. But also they write about the knowledge about something that you need instance. How to get the good score toefl, or how to teach your sons or daughters, there are many kinds of book that exist now. The authors on this planet always try to improve their ability in writing, they also doing some study before they write to the book. One of them is this Vermiculture Technology: Earthworms, Organic Wastes, and Environmental Management.

#### **Jessie Davis:**

Reading a reserve make you to get more knowledge as a result. You can take knowledge and information originating from a book. Book is created or printed or descriptive from each source that filled update of news. In this modern era like at this point, many ways to get information are available for an individual. From media social similar to newspaper, magazines, science guide, encyclopedia, reference book, novel and comic. You can add your knowledge by that book. Isn't it time to spend your spare time to open your book? Or just trying to find the Vermiculture Technology: Earthworms, Organic Wastes, and Environmental Management when you required it?
