Reducing Disaster Losses Through Better Information (Compass Series) Board on Natural Disasters, Environment and Resources Commission on Geosciences, Division on Earth and Life Studies, National Research Council

Losses of life and property from natural disasters in the United States-and throughout the world-have been enormous and the potential for substantially greater future losses looms. It is clearly in the public interest to reduce these impacts and to encourage the development of communities that are resilient to disasters. This goal can be achieved through wise and sustained efforts involving mitigation, preparedness, response, and recovery. Implementing such efforts, particularly in the face of limited resources and competing priorities, requires accurate information that is presented in a timely and appropriate manner to facilitate informed decisions. Substantial information already exists that could be used to this end, but there are numerous obstacles to accessing this information, and methods for integrating information from a variety of sources for decision-making are presently inadequate. Implementation of an improved national or international network for making better information available in a more timely manner could substantially improve the situation.

As noted in the Preface, a federal transition team is considering the issues and needs associated with implementing a global or national disaster information network as described in the report by the Disaster Information Task Force (1997). This National Research Council report was commissioned by the transition team to provide advice on how a disaster information network could best make information available to improve decision making, with the ultimate goal of reducing losses from natural disasters. The report is intended to provide the basis for a better appreciation of which types of data and information should be generated in an information program and how this information could best be disseminated to decision makers.

From reader reviews:

Stevie Mozingo:

Here thing why this specific Reducing Disaster Losses Through Better Information (Compass Series) are different and trustworthy to be yours. First of all studying a book is good but it depends in the content than it which is the content is as scrumptious as food or not. Reducing Disaster Losses Through Better Information (Compass Series) giving you information deeper since different ways, you can find any publication out there but there is no guide that similar with Reducing Disaster Losses Through Better Information (Compass Series). It gives you thrill reading through journey, its open up your eyes about the thing that will happened in the world which is possibly can be happened around you. It is easy to bring everywhere like in playground, café, or even in your approach home by train. If you are having difficulties in bringing the branded book maybe the form of Reducing Disaster Losses Through Better Information (Compass Series) in e-book can be your option.

Douglas Barlow:

Exactly why? Because this Reducing Disaster Losses Through Better Information (Compass Series) is an unordinary book that the inside of the publication waiting for you to snap it but latter it will jolt you with the secret that inside. Reading this book close to it was fantastic author who also write the book in such amazing way makes the content on the inside easier to understand, entertaining method but still convey the meaning thoroughly. So , it is good for you for not hesitating having this ever again or you going to regret it. This excellent book will give you a lot of advantages than the other book have got such as help improving your proficiency and your critical thinking approach. So , still want to hesitate having that book? If I have been you I will go to the reserve store hurriedly.

Mildred Ralph:

Playing with family in the park, coming to see the coastal world or hanging out with pals is thing that usually you could have done when you have spare time, then why you don't try matter that really opposite from that. One particular activity that make you not experience tired but still relaxing, trilling like on roller coaster you have been ride on and with addition associated with. Even you love Reducing Disaster Losses Through Better Information (Compass Series), you can enjoy both. It is excellent combination right, you still would like to miss it? What kind of hangout type is it? Oh come on its mind hangout people. What? Still don't buy it, oh come on its known as reading friends.

April Brooks:

Reading a book to be new life style in this year; every people loves to examine a book. When you learn a book you can get a large amount of benefit. When you read books, you can improve your knowledge, mainly because book has a lot of information upon it. The information that you will get depend on what forms of

book that you have read. In order to get information about your analysis, you can read education books, but if you want to entertain yourself you can read a fiction books, this kind of us novel, comics, as well as soon. The Reducing Disaster Losses Through Better Information (Compass Series) provide you with new experience in studying a book.
